Isola Bitumenschindel Rechteck ziegelrot

Product	Bitumen shingles with thermoplastic modified bitumen and special glass fibre reinforcement. Backside of the shingle lap coated with water-repellent silan-sand. Upper part of the backside laminated with foil to avoid sticking inside the packaging or at the sub-construction. Top-side of the shingles covered with colored slate granules. Connected adhesive areas on the top-side for immediate and long-term bonding of the shingles.
Intended use	For pitched roofs (15° bis 85° slope) with sub-construction for mechanical fixing with nails. The jointed wooden formwork must be waterproofed by an underlay.
